D.I.Y. Made Easy

After you've cut in your edges at the ceiling and baseboard using a brush, use your roller to apply paint from the ceiling downward. Some often have telltale drips and spatters at the end of a paint job, but pros paint right over their mistakes as they work their way down the wall. Once an area starts to dry, it's best to leave it alone. Going back over it can leave marks and color streaks in the paint's surface.

With Every Jojo Purchased

Install your shower base on a level subfloor. The shower base itself is sloped toward the drain hole to allow the water to exit down the drain smoothly and quickly. If the subfloor is tilted by even as little as an inch, the shower base drain will not work properly and your bathroom could be flooded.

Steel Wheelbarrow

There are several kinds of fences that consist entirely of barbed wire. You can have the barbs facing in alternate directions or all of them facing the same way. You can also choose to leave space in between the wires or hang them close together. Think about the function of your fence and it will soon become obvious which kind of barbed wire fence should be chosen.
